DATE OF

THIS IS UNEVALUATED INFORMATION

- 1. The East German Ministry for Heavy Industry has issued a directive to all production enterprises under its control prohibiting them from giving information on production possibilities to representatives of important export agencies. The enterprises have used this directive to deny such information to representatives of the Covist Trade Delegation. This has caused protests by Martynov (fnu), of Karlshorst. As of 24 June, however, the directive had not been rescinded.
- 2. The former Soviet technical directors of the various SAG's are continuing their work at these plants. They are now called Technical Advisors. At Agfa/Wolfen the Technical Advisor's name is Petrov (fnu).
